Summary

Computer Science undergraduate with strong analytical, research, and communication skills developed through technical projects, hackathons, and collaborative initiatives. Quick learner with an ownership mindset, eager to support enterprise research, stakeholder mapping, and personalized outreach in a fast-paced Founder's Office environment.

Skills

Technical & Analytical Skills: Data Analysis, Research, Reporting, Problem Solving, Product Thinking, API Testing

Technologies: Git, Microsoft Excel, Power BI, Google Sheets, Wireshark, Linux

Languages: HTML5, JavaScript, Python, SQL

Soft Skills: Communication, Team Collaboration, Documentation, Adaptability

Experience

Cyber Crime Intern, Rajasthan Police Headquarters

June 2026 – Present

- Built and maintained structured databases from cybercrime helpline (1930) and portal complaints, analyzing patterns to identify emerging fraud trends
- Researched OSINT tools and evaluated their practical application in cybercrime investigation workflows
- Studied fraud typologies across cryptocurrency, UPI/banking, and social media channels, translating findings into structured project reports

Technical Intern, The Red Users

April 2025 – May 2025

- Independently researched and analyzed 10+ web application vulnerabilities (SQLi, XSS, CSRF) using OWASP ZAP, then distilled findings into clear, prioritized remediation reports for non-technical stakeholders
- Monitored and interpreted network traffic patterns using Wireshark, building the habit of digging past surface data to identify the real signal

Leadership & Activities

- **Co-Lead, Social Media Team** – Managed social media handles, created promotional content including posters and reels, and coordinated digital engagement initiatives
- Conducted and managed hackathons, technical events, and community activities, handling promotions, registrations, and participant engagement
- Collaborated with team members to ensure smooth execution of technical and social events

Projects

Network Traffic Analysis System

- Investigated network traffic patterns using Wireshark to identify anomalies and potential intrusion attempts, building a systematic approach to spotting signal in noisy data
- Analyzed attack patterns and irregular behavior, then documented findings into a structured workflow for repeatable investigation
- Reflected comfort with ambiguity and self-directed problem-solving in building the process from scratch

Education

VIT Bhopal University

Bhopal, India

Bachelor of Technology - Computer Science Engineering

CGPA: 8.43

Sep 2023 – May 2027

Achievements

1st Prize – CyberSecure Challenge 2025 – Won an international cybersecurity competition organized by Saint Louis University & Execellerate, awarded a \$200 scholarship for excellence in cyber hygiene and data protection strategies
